NEW ENGLAND ASTER

A Butterfly Favorite

0296-4844 (250seeds, 250mg)

Packed for 2021,
Sell by 10/31/21

0296 - New England Aster

(Symphyotrichum novae-angliae)

One of the tallest and most magnificent of the fall asters. Serves as an important late-season (after frost) nectar source for a variety of butterflies. Plants grow 3-6' tall and require fertile soil with adequate moisture. Perennial. Hardy to zone 4.

Learn To Grow It			
Start Indoors	**Germination**	**Plant Outdoors**	**Light**
In Early Spring	14-35 Days	24" Apart	Full Sun

Instructions- Sow seeds indoors in a flat just beneath surface of soil. Enclose flat with plastic and refrigerate for 2 weeks. Remove plastic wrap and place in warm, lighted area. May need staking in a garden border. Pinch back until late summer to prevent plant from falling over when heavily laden with blossoms.

BLACK-EYED SUSAN VINE

Happy to Climb or Cascade

Packed for 2021
Sell by 10/31/21
1285-5130 (25 seeds)

1285 - **Black-Eyed Susan Vine** *(Thunbergia alata)*

Also known as Clockvine. Native to tropical Africa. Formula mix of colors includes pure white, golden-orange, golden-orange with black centers, pure yellow, and yellow with contrasting black eyes. Great for hanging baskets, containers, or garden trellises. Very easy to start from seed, fast-growing, and quick to bloom. Grown as an annual in the North.

Learn To Grow It			
Start Indoors	**Germination**	**Plant Outdoors**	**Light**
6-8 Weeks before last frost	10-20 Days	12-18" Apart	Sun/Partial Shade

Instructions- Sow seeds indoors just beneath the surface of the soil. Plant out after the danger of frost has passed and when nighttime temperatures are above 50°F.

BUNNY TAILS

The Only Rabbit You Want in Your Garden

Packed for 2021
Sell by 10/31/21
1275-4795
250 seeds, 150mg

1275 - **Bunny Tails** *(Lagurus ovatus)*

It is difficult for gardeners of all ages to resist touching this flower's fluffy head, which is as soft as a bunny's tail! Compact but showy, this annual ornamental grass is easily grown in a border, for use as a cut flower, or in a container. Drought-tolerant once established with a dwarf habit. Annual, 6-12" tall.

Learn To Grow It			
Start Indoors 6-8 Weeks before last frost	**Germination** 15-21 Days	**Plant Outdoors** 4-6" Apart	**Light** Full Sun

Instructions- Sow seeds indoors 1/4" deep. Plant out after the danger of frost has passed in late spring. Can also be directly sown outdoors 3 weeks before the last frost. Prefers light, well-drained soil and will tolerate dry conditions.

COSMOS ***Cosmos bipinnatus***

LIFE CYCLE: Annual.

USES: Excellent cut flowers. Beds, containers, and mass plantings.

CULTURE: *Direct seed* – After last frost sow seed thinly in rows, barely covering seeds. Thin when first true leaves appear. *Transplant* – Sow seed thinly, barely covering, 5–7 weeks before setting out. Keep soil moist until emergence. When first true leaves appear transplant into larger containers. Harden off and transplant outdoors after last frost.

GERMINATION: 7–10 days at 75°F/24°C. Outdoors, soil temperature must be above 60°F/16°C.

LIGHT/SOIL REQUIREMENTS: Sun in any soil. Tall varieties may benefit from some wind protection.

SPACING: 9–12" apart. Wider spacing creates stronger, thicker stems.

HARVEST: *Fresh* – Harvest when petals on first flower are just opening, but have not yet flattened out. Deadheading is required to have blooms all summer long.

Firmament

FORGET-ME-NOT

Memorable Garden Performer

Packed for 2021,
Sell by 10/31/21
1264-4852 (500 seeds, 2.4g)

1264 - Firmament Forget-Me-Not

(Cynoglossum amabile)

Also known as Chinese Forget-Me-Not or Hound's Tongue, this variety bears masses of small, star-shaped, powdery-blue blooms that contrast nicely with deep grey-green foliage. A good cut flower and an eye-catching addition to borders. Introduced by the German company Ernst Benary; received an AAS in 1939. Hardy annual, 14-16" tall.

Learn To Grow It

Start Indoors	Germination	Plant Outdoors	Light
6-8 Weeks before last frost	5-10 Days	10-12" Apart	Sun/Partial Shade

Instructions- Sow seeds indoors 1/4" deep. Transplant outdoors in late spring after the danger of frost has passed. Can also be directly sown outdoors several weeks before the last frost. Plants self-sow readily.
