# REPORT

OF THE

# TOWN SCHOOL BOARD,

AND OF THE

### BOARD OF EDUCATION OF DIST. No. 1.

The Board of Education for District No. 1, in compliance with the law of this State, respectfully presents the following report:

During the year all our schools have been in session thirtysix weeks.

At the opening of the Fall Term it seemed best that a change should be made in the length of the terms, so that the Christmas holidays might come in the vacation; and it was arranged that the Fall Term should be fifteen weeks in length, the Winter Term eleven weeks, and the Spring Term ten weeks. This change has apparently met with the approval alike of parents, teachers and pupils.

When the Fall Term began it was found that there were seventy-three pupils enrolled in the Primary Department, twenty-five in excess of the seating capacity of the school room, and, of course, more than the teacher could instruct to the best advantage. To remedy the difficulty two plans very naturally presented themselves; to hire a room outside the school building, or to fit up and use the hall in the third story, and in either case to employ another teacher. It was found that the hall was not well adapted for use as a school room, and that to properly fit it up and heat it would entail considerable expense, and beside, many parents were unwilling that their children should be on

the third floor, on account of the difficulty of egress in case of fire, or any emergency; and many others, for various reasons, much preferred to have their children remain in the school building. In this embarrassment, the Board, after long deliberation, decided to have the larger pupils attend only in the forenoon, the session being three hours in length, and the smaller ones in the afternoon for a session of two hours. To do this it was necessary to make a slight addition to the teacher's salary, but it was by far the most economical method, and under existing circumstances seems to have met with quite general approval. At the school meeting, soon to be held, your Board will ask instructions in regard to the course to be pursued in future.

For several years there has been a steady increase in the number of pupils attending our schools, as will be seen from a reference to previous reports.

The report of 1876 gives the average enrollment for the year as 105, the highest enrollment for any one term 122, the salaries of teachers, \$736, the amount raised by extra tax, \$382. Five years later, according to the report of 1881, the average enrollment for the whole year was 126, the highest enrollment for a single term, 132. For the past year the average enrollment was 169, the highest for a single term, 179; teachers salaries, about \$1,800, the amount raised by extra tax, \$1,000. According to the report of last year, furnished to the State Superintendent of Public Instruction, the whole number of pupils enrolled in the town of Hanover was 323, of these 22 were under six years of age.

It will be observed that while the numbers in our schools have increased, the extra tax levied has increased in corresponding proportion; and if the increase is to continue, enlarged school accommodations, with increased expenditure, will become necessary in the near future.

The Board has procured plans and estimates for an addition to the present school building, which, if made, though the expense would be considerable, would give two additional rooms, thus providing for future growth as well as present needs. In this change ample provision would be made for cloak rooms, and an easy access to the hall, as well as for water closets.

The play ground, nearly opposite the school building, has recently been sold, and will probably be soon cut up into build-

ing lots. In view of this the Board would suggest the advisability of purchasing it, that for all time our school children may have a convenient and suitable play ground. The desirability of a play ground will become more and more apparent as the numbers in our schools increase.

During the past year our schools have maintained the high standard they had hitherto reached. The teacher, in very large measure, makes the school, and to secure and retain the services of experienced and skilled teachers liberal salaries must be paid. Our people are not satisfied with cheap teachers, they demand the best, and we trust that for this they will appropriate money even more liberally than they have in the past.

At the head of our High School is Miss M. G. Pinkham, an accomplished scholar, and a thorough, faithful and conscientious teacher, while Misses Clarke, Coleman and Rich, in charge of the Grammar, Intermediate and Primary Departments, still merit the high praise bestowed upon them in previous reports. For the last part of the year the schools have received valuable instruction in music from Mr. W. M. Newton, of the Senior class in the college.

Your Board has done its best to advance the interests of the schools entrusted to our care, and thanking parents and public for their consideration, and the aid rendered them in the performance of their duties, and the taxpayers of the district for their liberality, and bespeaking hearty support and co-operation for the future, we are very respectfully yours,

Balance in Treasury March 1, 1889,		63	73
	\$1	157	34

The undersigned, having attended to their duties, find that the Treasurer of School Board charges himself as having cash on hand at beginning year,

Received of town Treasurer,

\$26 33

1131 01

\$1157 34

He credits himself as having paid out on account,

\$1093 61

Cash on hand,

We find the Treasurer's account correctly cast and properly vouched.

The School Board of the town District would, in making report of the schools maintained in town during the past year, faithfully and fairly present the condition and standing of the same, and respectfully call the attention of the voters of the District to their needs in order that they may rank with the schools of neighboring towns. The Board considers itself very fortunate in being able to secure as good a class of teachers as they have.

While all have striven to do good work, most of them have done as well as could reasonably be expected, giving very good satisfaction to employers and patrons, imparting as they had received. A majority of the teachers being inexperienced in the business and without ever having had any especial drill or training to fit them for their work, it would be unreasonable to expect as much work as from a professional teacher. Any observant person can readily distinguish the difference in quality of the work, of a skilled workman, one well acquainted with

the best methods of executing and perfectly familiar with the use of all tools required for the accomplishment of any nice piece of work, and one, who, though by nature equal and perhaps superior to the former, yet never having given his time, or put himself under the instruction of a skilled workman, expects by reason of natural ability, or by his genius, to successfully compete with him who has faithfully fitted himself for his life work, striving to inform himself on every matter that may have a bearing on his profession. It is from those of the first class of workmen we would like to be able to secure our teachers, but by reason of our lack of means, we cannot pay them the wages their services will command in more favored places. If we would see a steady improvement in our schools, see them constantly advancing, until they stand in the front rank, taking a position of which all might well be proud, we must by some means, raise the funds to enable us to secure the best teachers to be obtained.

During the year the School board has completed the change in arithmetics commenced last year, it being advisable on account of the variety of text-books found in many of the schools thereby securing a uniformity which is very desirable. Have also tried to keep the buildings and furnishings in repair, as far as were able with the five per cent of school money allowed by law, yet more money is needed to put them in suitable condition for school purposes, and that they may not depreciate in value. No one thing speaks plainer for the standing of a community than the condition of its school property. In maintaining the schools your committee have, to the best of their ability, endeavored to give all scholars as nearly equal advantages as possible, excepting where, in some schools additional funds have been contributed in the way of board, fuel, etc., in such schools, as far as we could, have sought to give the full benefit of funds contributed. In the making up of our tabular report it is necessarily imperfect as three of the schools are in session at the making out of the report, and some of the registers of other schools not properly returned.

All of which is respectfully submitted
